

ŠKODA KODIAQ **RS**

Go everywhere, quickly

Progressive steering with firm, RS-specific characteristics. Combination of dynamic control and easy manoeuvring:

- › **straight roads** – a standard sense of direct control
- › **winding roads** – noticeably more dynamic control
- › **urban traffic and parking manoeuvres** – easier control, with fewer turns required for full-lock

Electronic Stability Control (ESC)

- › allows a less restrictive Sport mode to be selected, making it possible to take bends with a slight drift

Reinforced braking system

- › reinforced rear brakes compared to the standard KODIAQ
- › 17-inch front and rear brakes with RS-specific red callipers

Dynamic Chassis Control

calibrated with a special dampening

20-inch Xtreme alloy wheels with an RS-exclusive design

- › manufactured using sophisticated precasting technology, which results in lightweight, high-strength wheels
- › high-performance tyres with a self-sealing polymer layer for increased puncture resistance
