

THE NEW ŠKODA KODIAQ – DATA & FACTS

DESIGN

- › Transfer of ŠKODA's new and characteristic design language into the SUV segment
- › High recognition value due to the distinctive interplay of elegant lines, sporty contours and a robust appearance
- › Typical ŠKODA balance of functionality and aesthetics
- › Wide, three-dimensional radiator grille conveys a robust character
- › Side view with a long wheelbase, short overhangs and highly recessed shoulder line
- › Crystalline details pay homage to traditional Czech crystal glass art
- › The exterior's crisp design is carried through to the interior: the interior comes across as protective, robust and elegant
- › Evolution of ŠKODA design in the interior: the instrument panel is three-dimensional and divided into two equal sections for the driver and the front passenger
- › Optional capacitive touch displays in a glass design
- › Bold vertical elements, such as the four large air vents, are characteristic of the interior

OVERALL PACKAGE

- › Typical of ŠKODA: optimal use of the exterior dimensions for the size of the interior
- › The largest boot capacity within its class: 720 l up to 2,065 l in the five-seater when the rear seats are folded down
- › The interior space also scores points: the second row of seats has 104 mm of legroom and 1,014 mm of headroom
- › By moving the seats lengthways and adjusting their angle, they can be adapted to a wide range of seating and loading requirements
- › Folding rear seats in a ratio of 60:40
- › Available as ŠKODA's first seven-seater with an optional third row of seats
- › Weighs from 1,452 kg due to weight reduction and the use of high-strength steel

DRIVE

- › Two TDI and three TSI engines with turbocharger and direct injection
- › 1.4 to 2.0 l of capacity, power output ranging from 92 kW (125 PS) to 140 kW (190 PS)
- › 2.0 TSI with newly developed combustion system

- › 7-speed, dual-clutch DSG transmission makes its debut in the ŠKODA KODIAQ
- › Manual 6-speed gearbox, 6- or 7-speed DSG transmission
- › All-wheel drive with electronically controlled multi-plate clutch for the four most powerful engines
- › Driving Mode Select includes Snow mode for all-wheel drive for the first time
- › Off-road mode for optimal handling when using all-wheel drive on rougher terrain (optional)
- › Up to 2.5 t of towing capacity, electrically retractable tow bar

FUNCTIONALITY

- › More than 30 'Simply Clever' features available, including the new door-edge protection, electric child safety lock, In-Car-Communication and sleep package
- › Comprehensive equipment, including:
 - › Heated steering wheel
 - › Virtual pedal for opening and closing the tailgate
 - › Electrically operated tailgate incl. option to close it from inside the car
 - › Full-LED headlights as an option, LED rear lights as standard

DRIVER ASSISTANCE SYSTEMS

- › State-of-the-art driver assistance systems for confident and safe driving - many of which can only be found in higher vehicle classes
- › New assistance systems:
 - › Area View
 - › Tow Assist
 - › Manoeuvre Assist
 - › Predictive Pedestrian Protection
- › Front Assist with City Emergency Brake (EU) and Multi-Collision Brake as standard
- › Adaptive Cruise Control, Blind Spot Detect and Traffic Jam Assist are available as an option

INFOTAINMENT

- › With ŠKODA Connect, the brand's new innovative mobile online services, ŠKODA offers more information, comfort and safety
- › ŠKODA Connect includes Infotainment Online and Care Connect
- › Infotainment Online provides real-time navigation and more information, such as Google Earth, Street View or information on the cheapest petrol station nearby

- › Care Connect provides help in countless situations and can be used for remote access using the new ŠKODA Connect app – for route planning from home as well as more information, including data about the vehicle or its current location
- › The centrepiece of the Care Connect services is the Emergency Call after an accident: the eCall is sent directly to an emergency call centre if a restraint system has been activated
- › State-of-the-art infotainment systems: Swing, Bolero, Amundsen and Columbus
- › Amundsen and Columbus systems are available with a WLAN hotspot and the Columbus system is also available with an LTE module
- › Inductive smartphone charging is possible via Phonebox
- › SmartLink for integrating Apple CarPlay, Android Auto and MirrorLink™
