

READY FOR WINTER WITH ŠKODA ACCESSORIES

ŠKODA CARS ARE WELL PREPARED FOR WINTER MONTHS: IN ADDITION TO ALL-WHEEL DRIVE, ŠKODA ALSO OFFERS A VARIETY OF PRACTICAL EQUIPMENT AND USEFUL GENUINE ACCESSORIES, WHICH HELP THE DRIVER OVERCOME ANY WINTER OBSTACLES.

ALWAYS WARM

Nobody likes scraping the ice off the windows in the morning or spending those first few minutes in a frosty car. ŠKODA owners are spared these experiences. Alongside the heated mirrors and heated rear window, ŠKODA cars are also optionally available with a heated windscreen. The driver has a clear view in no time. The melting ice will be less harsh on the windscreen wipers too. The heated windscreen washer jets complement this offering. To make the first few miles more comfortable, ŠKODA cars are available with heated front and rear seats as well as a heated steering wheel.

The additional heating system is a comprehensive solution, which preheats the interior to the optimum temperature, even before the occupants get into the car. This independent heating system can be adjusted via the display in the vehicle, via remote control or via the mobile app as part of the ŠKODA Connect services.

NEITHER SNOW NOR FROST CAN HOLD YOU BACK...

As much as the all-wheel drive is a handy helper in winter, in certain extreme situations it may not be sufficient. That's when it is time to pull over and put on the snow chains. These are part of the wide range of ŠKODA Genuine Accessories. For every model, there are alloy wheel variants that are suitable for snow chains. Another useful feature is the mudguard behind every wheel, which helps to keep the body clean.

FOR SKIERS AND SNOWBOARDERS

The already highly generous boot space in ŠKODA vehicles can be easily increased by installing roof rails which are fitted with a lockable roof box, lockable ski or snowboard carriers, or a ski bag. The lockable roof box offers a capacity of up to 380 litres that can be used for luggage, 5 sets of skis or 4 snowboards.

TRAVELLING IN COMFORT

ŠKODA vehicles are characterised not only by the volume of the luggage compartment, but also by its additional practical features. In addition to the numerous hooks, compartments, nets and cargo fasteners, you will be particularly delighted by the double-sided floor mats, the plastic boot liner or the boot mat including loading sill protection in winter. These features help keep the boot clean.

PRACTICAL ADDITIONS

In all ŠKODA 4x4 cars the textile floor mats in the interior can be exchanged for plastic ones. What's more, most of the vehicles are equipped with an ice scraper, which is located on the back of the fuel filler flap. It is however advisable to also have a tow rope with you and, ideally, a snow shovel. And in case you get hopelessly stuck in drifting snow, ŠKODA AUTO offers a solution that at least makes waiting for help enjoyable – a portable coffee machine.
