

VEHICLE BODY MATERIAL CONCEPT

Designed according to the latest standards and using **hot-formed, high-strength steel** components

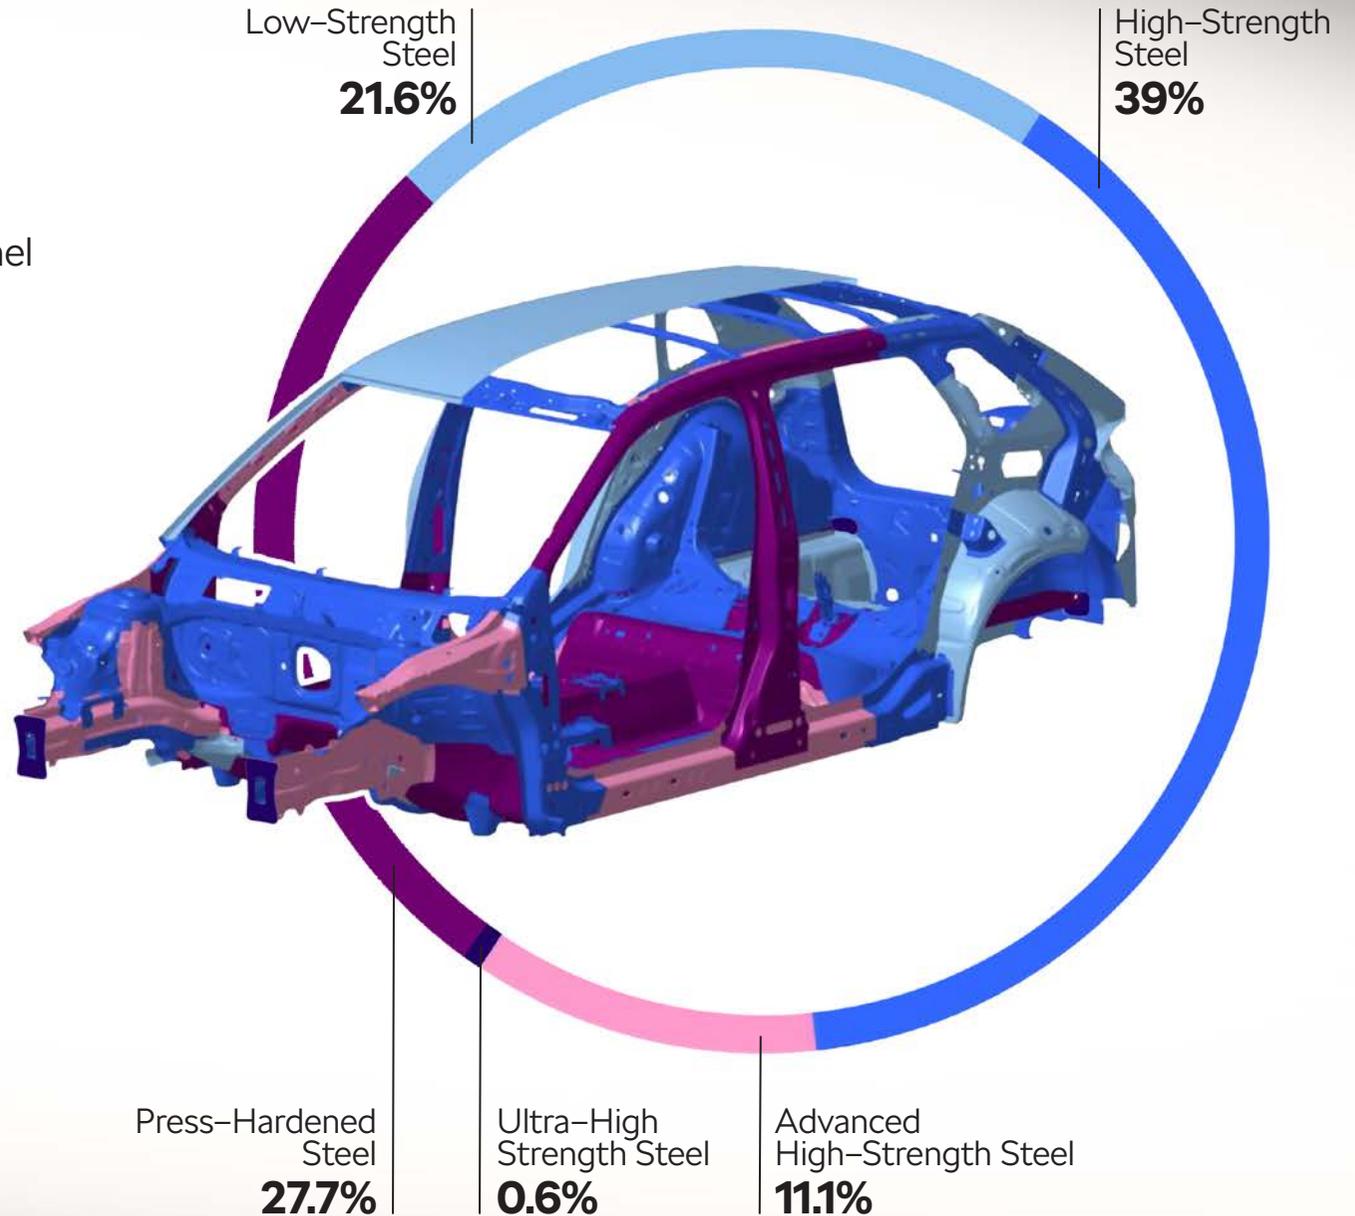

Mainly used on A- and B-pillars, the firewall, and the transmission tunnel

Benefits of high rigidity:

- > **excellent handling**
- > **high quality over time**
- > **high level of safety**

Scale of steel hardness

-  Low-Strength Steel
-  High-Strength Steel
-  Advanced High-Strength Steel
-  Ultra-High Strength Steel
-  Press-Hardened Steel
