## Connectivity: two infotainment systems and an impressive list of ŠKODA Connect mobile online services

- › Infotainment systems with 7- or 10-inch colour touchscreens
- › Optional navigation function can be downloaded from the SKODA Play Apps
- › Numerous comfort and safety features available from the MyŠKODA Connect app
- › Style trim level includes ŠKODA Sound system with subwoofer

**Mladá Boleslav / Pune, 26 June 2021 – The new ŠKODA KUSHAQ has a choice of two advanced infotainment systems with a 7- or 10-inch touchscreen. Wireless SmartLink technology enables smartphone integration. From Ambition upwards, users can access a comprehensive range of MyŠKODA Connect mobile online services and download a navigation function for the premium infotainment system from the SKODA Play Apps.**

The KUSHAQ offers excellent connectivity from the Ambition trim level upwards. This provides the driver with remote vehicle access and a plethora of myŠKODA Connect mobile online services via the MyŠKODA Connect app. These include vehicle information, driving data (including statistics on completed journeys with actual costs), route tracking and the estimated time of arrival, provided the offline navigation function has been downloaded from the SKODA Play Apps.

The MyŠKODA Connect app can display the vehicle's location in real time or a walking route to where it is parked. A smartphone can be used to find a petrol station or call up the Vehicle Health Report, which automatically stores important data every time the ignition is switched off. It can notify the owner with customised information such as when the KUSHAQ is speeding or travelling outside a specified area and may have been stolen. If necessary, in the event of an accident, the app will contact a helpline, and send a text message with the vehicle's location to an emergency contact.

### **Touchscreens measuring 7 and 10 inches**

In the Active trim level, the KUSHAQ features an infotainment system with a 7-inch colour touchscreen and Bluetooth functionality for hands-free phone calls. Electronic devices can be charged and data transferred via a USB-C port. The top-level infotainment system in Ambition and Style has a 10-inch colour touchscreen with smartphone-style functionality. The system supports the Bluetooth standard 4.0 and comes with a Wi-Fi hotspot. Smartphones can be paired and the app store accessed without the need for a cable using Wireless SmartLink technology. Downloads from the SKODA Play Apps allow for the range of features to be expanded, for example, by a navigation function. The GPS receiver required is pre-installed. There are two USB-C ports in the centre console for connecting and charging mobile devices via cable. The Style variant offers a Phone Box which allows smartphones to be charged inductively and a 340-watt ŠKODA sound system with six speakers and a subwoofer in the spare-wheel well.
