

### **Adaptive Cruise Control (ACC) up to 210 km/h**

In manual-transmission cars, Adaptive Cruise Control automatically maintains a safe distance from vehicles ahead at speeds above 30 km/h. For cars with automatic transmission, Adaptive Cruise Control includes Stop&Go, enabling the FABIA to follow the vehicle ahead in a traffic jam until it comes to a standstill.

### **Front Assist with Predictive Pedestrian and Cyclist Protection**

This system warns of a potential collision visually, acoustically and by gently applying the brakes. It automatically slows the car down in an emergency.

### **Side Assist**

Side Assist informs the driver of other road users approaching from behind. Two radars concealed under the rear bumper monitor the area behind the vehicle when it is in motion.

### **Rear Traffic Alert**

As drivers reverse out of spaces where the view is obstructed, this system provides them with alerts either visually or acoustically. If the driver does not react to the warning, the car automatically brakes.

### **Lane Assist including Road Edge Detect**

This system detects not only white boundary lines on the road, but also other distinctive types of road boundaries. As a result, Lane Assist helps to keep the car in lane and provides steering assistance even when the road is not well marked.

### **Auto Light Assist**

Auto Light Assist enhances comfort and safety by automatically switching between high and dipped beam without dazzling other road users.
