Exterior: emotive design, progressive lines and illuminated Crystal Face

- › Sporty and elegant appearance with long wheelbase and striking rear
- › Large 19- to 21-inch alloy wheels and panoramic glass roof
- › Full-LED Matrix headlights and full-LED tail lights with crystalline structures

Mladá Boleslav, 31 January 2022 – The new ŠKODA ENYAQ COUPÉ iV exhibits an even more emotive design than the SUV variant, the ENYAQ iV. Its roof – which slopes gently towards the rear from the B-pillar and features a dark tinted panoramic glass roof spanning its entirety as standard – and the striking rear give the brand-new coupé a distinct character. Large alloy wheels with diameters ranging from 19 to 21 inches make the car look athletic and powerful. This impression is further emphasised by the ENYAQ COUPÉ RS iV as this latest range-topping model also sports black design features and the RS-typical red reflector strip at the rear. The Crystal Face – 131 LEDs illuminating the distinctive ŠKODA grille – comes as standard for the ENYAQ COUPÉ RS iV.

Oliver Stefani, Head of ŠKODA Design, says: "In our brand-new production car, the ENYAQ COUPÉ iV, we have retained almost all aspects of the VISION iV study, which attracted a great deal of attention just over two years ago. Its elegant design featuring sculptural and crystalline details give the car a powerful appearance. Sporting athletic lines, our brand-new, all-electric first-class model is even more emotive than the successfully launched ENYAQ iV. At the same time, the coupé also offers brand-typical qualities, such as generous amounts of space and a high level of functionality."

Like the ENYAQ iV, the new ŠKODA ENYAQ COUPÉ iV is also based on Volkswagen Group's MEB modular electric car platform. The coupé is 4,653 mm long and 1,879 mm wide. Its height is 1,622 mm while its wheelbase measures a generous 2,765 mm. The sporty lines ensure outstanding aerodynamics boasting a drag coefficient (c_d) of 0.234. Large alloys measuring 19 to 21 inches emphasise the car's athletic look. The launch of the coupé also sees two new colour options added to the ENYAQ iV range: the striking metallic Phoenix Orange and metallic Graphite Grey, which replaces ŠKODA's metallic Quartz Grey. Mamba Green is exclusively reserved for the ENYAQ COUPÉ RS iV.

Distinct lines and exclusive coupé details

The body of the new coupé is characterised by athletic, elegant lines. Sporting its own, distinct front apron, it looks different to the ENYAQ iV, its body-coloured side skirts are also exclusive to the ENYAQ COUPÉ iV and make the car look even more elongated. From the B-pillar, the roofline gently slopes towards the rear and seamlessly merges with the sharp rear trailing edge. 'ŠKODA' in block lettering on the tailgate is another eye-catching detail. The black panoramic glass roof (standard feature), spanning the entire roof and seamlessly merging with the low-lying rear window, accentuates the coupé's elegant lines. It is the largest panoramic glass roof in the ŠKODA range, spanning the entire roof and seamlessly merging with the rear window. It is thinner than the full roof, providing plenty of headroom for the car's occupants. The panoramic glass roof allows more daylight into the interior, giving the car a more airy feel. Its coating helps to ensure that the climate

within the cabin is pleasant at all times. Striking contrasts are provided by the chrome surround of the ŠKODA grille and chrome window trim.

Even more dynamic: the ENYAQ COUPÉ SPORTLINE iV and ENYAQ COUPÉ RS iV

The ENYAQ COUPÉ SPORTLINE iV and ENYAQ COUPÉ RS iV look even more dynamic. Featuring a sports chassis as standard, they are 15 mm lower at the front and 10 mm at the rear. Sporty design details also include the surround of the ŠKODA grille, window trim and rear diffuser, which are all gloss black, as are the model designations, ŠKODA tailgate lettering and air curtain trim on the front apron. The air curtain trim is C-shaped on the SPORTLINE and comes with an additional centre piece forming an E on the RS variant. The ENYAQ COUPÉ RS iV, like all other RS models by the Czech carmaker, sports a full-length red reflector on its rear bumper.

Both models come with acoustic front and rear side windows made of laminated glass that reduces the noise level in the interior, as well as dark tinted rear side and rear windows. The anthracite Vega alloy wheels on the ENYAQ COUPÉ SPORTLINE iV are 20 inches in diameter, while the optional 21-inch Supernova alloys are black. The ENYAQ COUPÉ RS iV comes with black 20-inch Taurus wheels as standard; 21-inch Vision wheels with an anthracite finish are optional. Both feature aerodynamically optimised plastic Aero trims. The two sporty coupé variants can also be identified by their model-specific wing badges either displaying SPORTLINE lettering or an RS emblem.

Full-LED Matrix headlights and the Crystal Face create visual highlights

ŠKODA equips both the ENYAQ COUPÉ SPORTLINE iV and the ENYAQ COUPÉ RS iV with full-LED Matrix headlights as standard. Within these, each high-beam module features 24 LEDs, which can be controlled individually and enable the driver to have the high beam on at all times without dazzling other road users. For the other models, the full-LED Matrix headlights are optional; their standard range of equipment includes LED modules for low beam, high beam and daytime running lights. The Crystal Face – with 131 LEDs illuminating the ŠKODA grille's vertical ribs and horizontal strip – creates a special visual highlight. This is a standard feature for the ENYAQ COUPÉ RS iV and optional for all other variants. Furthermore, the Crystal Face's LED modules of the full-LED Matrix headlights for low beam and high beam, as well as the daytime running lights, create an animated welcome display. The full-LED tail lights, forming the brand-typical C-shaped light cluster, feature crystalline, additionally illuminated areas, dynamic indicators and an animated Coming/Leaving Home function.
