Interior: Design Selections and option packs

- › The ENYAQ COUPÉ iV also comes with modern, living-inspired Design Selections instead of classic trim levels
- › Design Selections 'Lodge' and 'ecoSuite' feature sustainable materials
- › Intelligent optional packages and selected individual options for all models

Mladá Boleslav, 31 January 2022 – As with the ENYAQ iV, the classic trim levels have been replaced by Design Selections for the ENYAQ COUPÉ iV's interior, offering a new and clear structure of the choices available. The Design Selections have been inspired by modern living environments. The style, colours and materials used, some of which are particularly sustainable, are perfectly aligned. For the ENYAQ COUPÉ RS iV, there are two model-specific designs on offer. Ten intelligent packages as well as some individual options make it possible to fully configure a brand-new ŠKODA ENYAQ COUPÉ iV in just six steps.

As with the SUV, the interior of the ŠKODA ENYAQ COUPÉ iV is characterised by the new Design Selections. They are based on modern living environments and follow a certain style for the upholstery, decorative trims, dashboard and materials. The entry-level specification for the new coupé is the Design Selection 'Loft', presenting a modern and homely feel with easy-to-clean materials and a harmonious combination of grey and black shades.

Seat covers made of new wool and recycled PET bottles

Particularly sustainable materials are used in the Design Selection 'Lodge'. The seat covers are made of 40% natural new wool with the Woolmark Company quality seal and 60% polyester from recycled PET bottles. The dashboard is upholstered in fabric; soft materials and light colours dominate. Leather and Suedia microfibre provide the Design Selection 'Lounge' with distinct aesthetics and lend it a modern look. Coloured piping and contrasting stitching are exclusive details.

Style and comfort, optionally with ecologically tanned leather

The soft, black leather seats with contrasting cognac-coloured stitching and piping in the Design Selection 'Suite' offer a high level of comfort. The 'ecoSuite' takes a step further, combining a classic and luxurious feel with a high degree of sustainability. Here, the cognac-coloured leather seat upholstery is tanned through an eco-friendly process using olive leaf extracts, and without the use of any chemicals. Stone-grey piping and contrasting stitching finish off the look with style.

ENYAQ COUPÉ SPORTLINE iV with black interior

Black sports styling characterises the Design Selection available exclusively for the SPORTLINE variant in the ENYAQ COUPÉ iV range. The Suedia-upholstered sports seats with integrated headrests feature grey decorative stitching, as does the leather multifunction sports steering wheel with three spokes, paddles for selecting the various recuperation levels and a SPORTLINE badge. The roof lining is black while the leather-style dashboard and door trim feature model-specific carbon-fibre-effect decorative strips.

Two Design Selections exclusively for the ENYAQ COUPÉ RS iV

The ENYAQ COUPÉ RS iV is available with two model-specific Design Selections exclusively reserved for this particular variant. In both options, the standard equipment includes carbon-fibre-effect decorative strips on the dashboard and door trim, pedal covers in aluminium design, and sports seats with integrated headrests and an RS emblem. In the Design Selection 'RS Lounge', the seats are upholstered in black Suedia microfibre featuring lime-coloured piping and contrasting stitching. This colour accent can also be found on the contrasting stitching of the floor mats and the heated leather multifunction sports steering wheel with three spokes as well as an RS badge. The dashboard is also upholstered in black Suedia with decorative stitching. The Design Selection 'RS Suite' is optional for the sports-styled range-topping model, featuring seat covers made of black perforated leather with grey piping and contrasting stitching; this is continued on the leather multifunction sports steering wheel which is also adorned by an RS badge. The dashboard is upholstered in a leather-look material to match the seats, and is decorated with contrasting stitching.

Extensive range of standard equipment and themed optional packages

The ENYAQ COUPÉ iV's range of standard equipment includes the Digital Cockpit with a 5.3-inch display and a 13-inch central touchscreen that provides access to the infotainment system and all vehicle functions. All coupés come with dual-zone Climatronic, a two-spoke multifunction leather steering wheel sporting control buttons and knurled wheels for intuitive operation, and the KESSY GO keyless start button. The models fitted with the larger battery also feature a heated steering wheel with paddles to adjust the degree of energy recovery. The equipment can be expanded with ten optional packs arranged by elements, such as comfort, driving dynamics, climate control, assistance systems and infotainment. Most of these packages are available as a Basic as well as a Plus bundle.

The range of options for climate control includes heated front and rear seats as well as a heated windscreen and, for the ENYAQ COUPÉ RS iV, tri-zone Climatronic. The 'Seating Comfort' pack offers electric seat adjustment; the Plus bundle also comprises a massage function for the driver's seat. A selection of individual options is available for all models. These include an anti-theft warning feature with interior surveillance, rear side airbags, an electrically retractable tow bar and a sports chassis which is lower by 15 mm at the front and 10 mm at the rear. This chassis, as well as progressive steering, comes as standard for the ENYAQ COUPÉ SPORTLINE iV and the ENYAQ COUPÉ RS iV.

Generous amounts of space and a boot with a capacity of 570 l

The ENYAQ COUPÉ iV offers plenty of space for five people and their luggage. The long wheelbase and flat floor space mean that there is plenty of legroom. Despite the model's sloping roofline, the headroom is on par with that of a ŠKODA OCTAVIA COMBI. The boot has a capacity of 570 l and, thanks to a low loading sill and an optional electric tailgate, can also be conveniently accessed via the virtual pedal, which allows the tailgate to be opened with just a foot movement.
