Exterior: black accents create a sleek appearance

- › Sporty look with black radiator grille, wing mirrors and rear diffuser
- › LED headlights and black 16-inch wheels as standard
- › Best aerodynamics in the segment with a drag coefficient (c_d) from 0.28

Mladá Boleslav, 15 February 2022 – The new ŠKODA FABIA MONTE CARLO is characterised by athletic front and rear aprons and black design details. Featuring streamlined proportions, sharply drawn headlights and alloy wheels measuring up to 18 inches, the model looks particularly sporty.

Oliver Stefani, Head of ŠKODA Design, says: "This latest MONTE CARLO variant brings the significantly more emotive design of the new, fourth-generation FABIA sharply into focus. The body is longer, sleeker and wider, conveying a sense of dynamism that is further enhanced by the model-specific front and rear aprons. Black details, such as those on the radiator grille or the wing mirrors, identify the new range-topping model at first glance and continue the tradition of the MONTE CARLO variants."

Its numerous black design elements make the new ŠKODA FABIA MONTE CARLO look even more athletic. In addition to the surround of the striking ŠKODA grille, the spoiler lip on the front apron also features a black finish, as do the wing mirror caps, decorative side skirt trim and the diffuser on the sports-styled rear apron. The ŠKODA lettering on the tailgate is black as standard, while a black roof is available as an option. Furthermore, the sleek range-topping model is adorned by MONTE CARLO badges on the front wings and features tinted rear and side windows (SunSet).

Headlights with LED technology and fog lights

The FABIA MONTE CARLO's precision-cut headlights feature LED technology as standard, with full-LED headlights available as an option, offering more light-intensive low and high beams as well as cornering lights and an adaptive lighting function. The range of standard equipment also includes fog lights. The new FABIA MONTE CARLO rolls out of the factory on gloss black 16-inch Proxima alloy wheels with removable, aerodynamically optimised plastic trims. The 17-inch Procyon alloys, also with Aero trims and featuring a gloss black finish, and the 18-inch Libra wheels are optional.

Best aerodynamics in the segment with a drag coefficient (c_d) from 0.28

Thanks to sophisticated details, such as the actively adjustable cooling shutter in the front bumper's lower air inlet and the extensive underbody cladding, the latest FABIA sets a new benchmark in the small car segment with a drag coefficient (c_d) from 0.28. To improve aerodynamics, the cooling shutter's actively adjustable slats automatically close when there is little need for cooling. This results in fuel savings of up to 0.2 l per 100 km when travelling at a constant speed of 120 km/h. For every kilometre driven with the shutter closed, the new FABIA emits up to five grams less CO₂. To allow for a high level of cooling or to accommodate short stops, the system opens the shutter so the maximum amount of air can flow in.

Monte-Carlo is a registered trademark by Monaco Brands.
