## Interior: carbon-fibre look with black and red details

- › A sleek interior with height-adjustable sports seats
- › Multifunction sports steering wheel with three spokes and pedal covers in stainless steel
- › Optional digital instrument cluster with a specific, more dynamic background for the layouts

**Mladá Boleslav, 15 February 2022 – The ŠKODA FABIA MONTE CARLO is instantly identifiable as the sporty lifestyle variant in the range by its interior. With sports seats, a three-spoke multifunction sports steering wheel, carbon-fibre effect on the dashboard as well as black and red design details, it continues the tradition of the MONTE CARLO models. The optional digital instrument cluster additionally offers a model-specific MONTE CARLO layout.**

The interior of the new range-topping variant is predominantly black and features a touch of red, for example on the covers of the sports seats with integrated headrests, which come as standard. The horizontal decorative strip on the dashboard, as well as parts of the centre console and the door handles also exhibit a red finish, while the roof lining and roof pillars are black. The armrests on the front doors and the lower part of the dashboard feature a sporty carbon-fibre effect as a decorative trim, with contrasting white stitching on the dashboard. The pedal covers gleam with a stainless-steel look, and the door sills are adorned by a FABIA logo.

### **Leather applications with black stitching**

The handbrake lever and three-spoke multifunction steering wheel come in leather with black stitching as standard. The latter features shift paddles on models with DSG. The range of standard equipment for the FABIA MONTE CARLO also includes the new LED ambient lighting, which illuminates the decorative dashboard trim in red. White is another colour option if the vehicle is equipped with the Amundsen infotainment system. The specification also includes illumination of the centre console and the front door handles, as well as LED reading lights in the front and rear.

### **Digital instrument cluster and comfort features as seen in higher-tier vehicles**

This is the first ŠKODA FABIA MONTE CARLO to be available with a digital instrument cluster – a 10.25-inch customisable digital display which, exclusively for the sporty range-topping model, offers a specific, more dynamic background for the layouts. The optional Virtual Cockpit, as the digital instrument cluster is also referred to, can display logos of radio stations, covers of music albums and stored pictures of callers, among other things. Furthermore, the map can zoom in on junctions and display them in a separate window. Other optional extras include a heated steering wheel and a heated windscreen for increased safety in winter.

*Monte-Carlo is a registered trademark by Monaco Brands.*
