## Engines: two powerful yet efficient TSIs

- › **Powerful and efficient engines: 85 kW (115 PS) and 110 kW (150 PS)**
- › **Convenient six-speed automatic and seven-speed DSG transmissions optional**
- › **Making its debut in the segment: Active Cylinder Technology to lower fuel consumption and emissions**

**Mladá Boleslav / Pune, 28 February 2022 – There is a choice of two powerful yet efficient TSI petrol engines for the ŠKODA SLAVIA. The entry-level variant, a three-cylinder 1.0 TSI, produces 85 kW (115 PS), while the top-level engine, a four-cylinder EVO-generation 1.5 TSI, delivers 110 kW (150 PS). Both units meet India's stringent BS6 emission standards and come with a six-speed manual gearbox as standard. Stop/Start technology with recuperation is another standard feature. A six-speed automatic gearbox is available as an option for the 1.0 TSI, while the 1.5 TSI can be fitted with a seven-speed DSG.**

ŠKODA offers the new SLAVIA with a choice of advanced and efficient TSI petrol engines. The two units are direct injection engines and offer dynamic performance as well as low fuel consumption. Both engines meet India's stringent BS6 emission criteria and come with a six-speed manual gearbox and front-wheel drive as standard.

### **Powerful and efficient 1.0 TSI**

The SLAVIA's entry-level engine is a powerful 1.0-litre TSI. The three-cylinder petrol unit develops 85 kW (115 PS) and a maximum torque of 178 Nm, allowing the car to accelerate from 0 to 100 km/h in 10.7 seconds and reach a top speed of 190 km/h, while the Stop/Start system with recuperation (standard feature) contributes to the car's low fuel consumption and correspondingly low CO<sub>2</sub> emissions. The variant with the optional six-speed automatic transmission also comes with Stop/Start technology as standard and it can sprint from 0 to 100 km/h in 11.7 seconds, with a top speed of 190 km/h.

### **Plasma-coated 1.5 TSI EVO with Active Cylinder Technology**

The top-end engine is the 1.5 TSI with a power output of 110 kW (150 PS) and maximum torque of 250 Nm. The four-cylinder 1.5-litre EVO-generation engine allows the SLAVIA to sprint from 0 to 100 km/h in 8.8 seconds and to achieve a top speed of 190 km/h. Numerous technical measures enable low fuel consumption. The engine can also be coupled with a seven-speed DSG. Both cars, whether fitted with a manual gearbox or automatic transmission, come with Stop/Start technology with recuperation as standard. The turbocharger features variable vane geometry, which produces more torque at a wider range of engine speeds. The cylinder liners are plasma-coated with a layer that measures just 150 µm (0.15 mm). This reduces internal friction, which lowers fuel consumption and emissions. Through better distribution and dissipation of heat in the combustion chamber, it also lowers the thermal load on the engine. Active Cylinder Technology (ACT), which makes its debut in the segment, automatically shuts down two cylinders when engine load is low, further reducing fuel consumption and CO<sub>2</sub> emissions.

## ŠKODA AUTO

- › is successfully steering through the new decade with the NEXT LEVEL – ŠKODA STRATEGY 2030.
- › aims to be one of the five best-selling brands in Europe by 2030 with an attractive line-up in the entry-level segments and additional e-models.
- › is emerging as the leading European brand in India, Russia and North Africa.
- › currently offers its customers twelve passenger-car series: the FABIA, RAPID, SCALA, OCTAVIA and SUPERB as well as the KAMIQ, KAROQ, KODIAQ, ENYAQ iV, ENYAQ COUPÉ iV, SLAVIA and KUSHAQ.
- › delivered over 870,000 vehicles to customers around the world in 2021.
- › has been a member of the Volkswagen Group for 30 years. The Volkswagen Group is one of the most successful vehicle manufacturers in the world.
- › independently manufactures and develops not only vehicles but also components such as engines and transmissions in association with the Group.
- › operates at three sites in the Czech Republic; manufactures in China, Russia, Slovakia and India primarily through Group partnerships, as well as in Ukraine with a local partner.
- › employs 45,000 people globally and is active in over 100 markets.
