

EXTERIOR FEATURES SPECIFIC TO THE NEW FABIA RS Rally2

- › Bonnet latches
- › Polycarbonate side windows
- › No external fuel filler flap
- › Rally car-specific wing mirrors
- › Extended wings and bumpers

Air vents on both sides of the bonnet allow the hot air to escape the engine bay

Roof vent above the windscreen directs fresh air into the cockpit and its shape is optimised for airflow over the roof

Newly designed rear wing generates almost twice the downforce compared to the FABIA Rally2 evo

Front splitter reduces the amount of air flowing under the car

Brake ducts for efficient cooling

Air curtains direct the airflow past the body's side panels and wheel arches

Cut-outs in the lower area of the wings optimise the airflow along the sides of the car
