

The all-new Škoda Kodiaq

History of Škoda SUV models

Trekka

1966

Although not produced by Škoda and never sold in Europe, the car was manufactured by a New Zealand company for the local market in partnership with Škoda, featuring components also used in the historic 1960s Octavia model

Yeti

2009

Škoda's first SUV and the first Škoda with an off-road button as well as up to three boot floor options

Yeti

facelift
2013

Major facelift incorporating the new design language, now available in two trim levels – Yeti and Yeti Outdoor

Kodiaq

1st generation
2016

Škoda's first large SUV built on the MQB platform with advanced technologies, including DCC Adaptive Chassis Control. The first modern-day Škoda to be available as a 7-seater

Karoq

2017

As part of Škoda's successful SUV campaign, the compact Karoq SUV further expanded the Czech car manufacturer's SUV portfolio. The Karoq was the first Škoda to feature a fully customisable digital instrument cluster

Kamiq

2019

Škoda's first city SUV and the first Škoda offered with dynamic front indicators
