

Interior: Design variants and sustainable materials

- › **Restructured product range with three trim levels and a total of six interior variants along with equipment packages and individual options**
- › **Materials for new seat covers and door panels include recycled fabrics as well as hemp and kenaf**
- › **New, more intuitive control panel for the optional Climatronic system**

Mladá Boleslav, 1 August 2023 – The update for the Škoda Scala and Kamiq includes a restructuring of the product range. A total of six interior variants are available across the three new trim levels Essence, Selection and the sporty Monte Carlo top version. Similar to the all-electric Enyaq family, they come in the shape of Design Selections inspired by modern living environments, boasting perfectly coordinated colours and materials. The redesigned covers for the seats, instrument panel and door trim panels also use recycled fabrics along with natural materials such as hemp and kenaf. Additional equipment features are offered as packages in several categories, and then there are further individual options. The optional Climatronic system has been given a new, more intuitive control panel.

Škoda has combined its update of the Scala and Kamiq with a restructuring of its product range. The new trim levels Essence, Selection and Monte Carlo offer a total of six interior variants. Using perfectly coordinated colours and materials, the Design Selections take their cues from modern living environments. The Design Selection “Studio” in the new Essence entry-level model comes with black fabric upholstery. The trim level Selection offers a choice of four different Design Selections. In the Design Selection “Loft”, for example, grey fabric is used for the seats and a decorative pad on the instrument panel, while the Design Selection “Lodge” comes with Suedia microfibre, again in grey. “Lodge” also features copper-coloured Hot-stamping and LED ambient lighting able to switch from white to red as standard. The multifunction steering wheel, gear knob and handbrake lever are covered in leather.

Comfortable or sporty with the design variants “Suite”, “Dynamic” and “Monte Carlo”

The comfort-oriented Design Selection “Suite” comes with leather-upholstered seats that can be heated and electrically adjusted as standard. The Hot-stamping has a chrome look. The Design Selection “Dynamic” is focused more strongly on sportiness. The sports seats with integrated headrests are partly upholstered with black Suedia, which is also used for the pad on the instrument panel, as in the Design Selection “Suite”. The roof lining is again black. Red Hot-stamping adds visual highlights. The pedals have an aluminium look. The sporty top model Monte Carlo offers even more visual highlights with the Design Selection also called “Monte Carlo”. Here the sports seats are upholstered in man-made Carbon leather, as are the decorative pad on the instrument panel and the door trim panels. The multifunction sports

steering wheel has black stitching on the leather finish and bears a Monte Carlo badge. Adjustable LED ambient lighting is standard for the “Monte Carlo” variant as well.

Sustainable materials

In order to further reduce its vehicles' CO₂ footprint in production, Škoda Auto uses even more sustainable materials for the Scala and Kamiq than before – recycled materials for the upholstery, flooring and foot mats are complemented by natural, renewable raw materials. The door trim panels, for example, are partly made of fibres from hemp and kenaf, a type of hibiscus. The headliner also contains a proportion of these fibres for added strength.

Equipment packages and individual options

The restructured product range for the Scala and Kamiq offers popular optional equipment intelligently combined into packages in several categories. The Climatronic system, for example, which has been given a new, more intuitive control panel, can be ordered as part of the Technology package. The Assisted Drive package includes Adaptive Cruise Control (ACC), Adaptive Lane Assist and Hands-on Detection, while Assisted Drive plus also offers Side Assist. The Winter package includes heating functions for the steering wheel and windscreen, while the various Convenience packages come with a reversing camera, Kessy keyless entry and an electric tailgate complete with Virtual Pedal. Individual options include an alarm system, a trailer tow hitch, heated rear seats, electric seat adjustment and a sound system.
