

Connectivity: Touchscreens in two sizes and Wireless SmartLink

- › 8.25-inch Škoda Infotainment or 9.2-inch Škoda Navigation displays with glazed front
- › Škoda Navigation, voice control and Wireless SmartLink available as options
- › Four optional USB-C ports with 45-watt fast charging

Mladá Boleslav, 1 August 2023 – The refresh of the compact Škoda Scala and Kamiq also includes further fine-tuning of the two models' infotainment systems and connectivity features. The Scala and Kamiq now feature an eight-inch Digital Display as standard, with a customisable 10.25-inch Virtual Cockpit available as an option. The free-standing central touchscreen display now measures at least 8.25 inches on the diagonal and has a glazed front. If a customer orders the optional navigation package, the display measures 9.2 inches. Four USB-C ports with an output of 45 watts, for fast-charging mobile devices or even laptops, are available as an option.

All variants of the Škoda Scala and Kamiq are always online. The Digital Display with a screen diagonal of eight inches is now standard; the optional 10.25-inch Virtual Cockpit offers various layouts and can be configured to suit individual preferences. The Škoda Infotainment system has a free-standing central touchscreen display with a screen diagonal of 8.25 inches and two rotary buttons; the front is glazed. The system offers digital radio reception (DAB) as well as Bluetooth connectivity for hands-free calling and transferring audio signals from a smartphone. Two USB-C ports with 15 watts of power and four speakers are standard.

Navigation package and technology packages available as options

The infotainment system can be optionally expanded with additional packages. The navigation package includes a 9.2-inch Škoda Navigation display and the ability to control the system via the digital voice assistant Laura. The package also includes Wireless SmartLink, web radio and four additional speakers. The navigation maps are updated over the air. The Essence models can be upgraded with a technology package equipping them with four USB-C ports that then also enable fast charging of mobile devices or even laptops at up to 45 watts. The Selection variants add an automatic anti-dazzle function for the interior mirror. The Technology Plus package also offers a further USB-C port on the interior mirror – ideal for connecting a dashcam, for example – as well as the Phone Box for inductive charging of compatible smartphones. Music lovers can choose the optional Škoda Sound System complete with a subwoofer in the spare wheel well.
