

# Updated Škoda Octavia

## Intelligent Park Assist & Remote Park Assist

### Intelligent Park Assist

- ▶ Works in combination with DSG
- ▶ Controls steering, braking, acceleration and gearshifts
- ▶ Uses ultrasonic sensors to detect free parking spaces between cars and perform parallel/perpendicular parking manoeuvres
- ▶ Supports parking manoeuvres
- ▶ Supports exiting from parallel parking spaces only

### Remote Park Assist (to become available later)

- ▶ Allows drivers to park remotely using the MyŠkoda app on their smartphone – the vehicle and the phone communicate via Bluetooth
- ▶ During the manoeuvre the car moves forwards or backwards, the app does not steer the vehicle
- ▶ The system controls braking, acceleration and gearshifts
