

# The updated Škoda Scala & Kamiq

Increased use of sustainable materials – Exterior & interior

Wheel arch cover (wood flour, kenaf, recycled materials)

Ice scraper (recycled plastic)

Water channel under windscreen (wood flour, kenaf, recycled materials)

Wood flour, recycled materials, hemp and kenaf are used in the door panels and headliner

Škoda Auto is committed to minimising the footprint of its operations and promoting the principles of the circular economy, for example by incorporating innovative and sustainable materials into its products.
