

# Updated Škoda Octavia

## Intelligent Park Assist & Remote Park Assist

### Intelligent Park Assist (to become available later)

- ▶ Works in combination with DSG
- ▶ Controls steering, braking, acceleration and gearshifts
- ▶ Uses ultrasonic sensors to detect free parking spaces between cars and performs parallel/perpendicular parking manoeuvres
- ▶ Supports exiting from parallel parking spaces only

### Remote Park Assist (to become available later)

- ▶ Allows drivers to park remotely using the MyŠkoda app on their smartphone – the vehicle and the phone communicate via Bluetooth when the user is within four metres of the Octavia
- ▶ The system automatically controls the steering wheel, brakes, accelerator and gearbox (forward and reverse), and also detects nearby obstacles
